INDEX.

A

Acetite of copper, on its manufacture, 141.
Adams' account of the discovery of a mammoth, 219.
Amber varnish, on preparing and applying, to wood, 406.
Analysis, memoir on vegetable and animal, 49
Anderson, on painting linen cloth in oil colours, 92
Argand's valve siphon, 20.
Asses skin, Cummings' composition for, 75.
Atkins' universal hydrometer, 469.

B

Banks, Sir J. on straw used in strawberry beds, 292.
Beams of ships, to secure without wooden knees, 376.
Beckmann's observations, &c. on staining wood, 127.
Bees, to secure from the ravages of worms, 190.
Bentham, on preserving water sweet in long voyages, 59
Besant's water wheel, description of, 183.
Bowler's screw-press, 373.
Brewer, on dyeing nankeen colour, 435.
Brown, on converting weeds, &c. into manure, 126.

C.

Camera lucida, description of, 267.
Carving in wood, the art of moulding, 417.
Cayley's plan for an improved theatre, 350.
Chapman, Dr. T. on the preservation of bees from worms, 190.
Chaptal, on making verdigrise, verdet, &c. 141.
natural and artificial puzzolana, 250.
making soap of wool, and its use, 66.
Cheese, Stilton, method of making, 152.
Cheshire, method of making, 169.
Chemical printing, description of, 203.
Cloth, linen, painted in oil colours, in a mode preferable to that commonly employed, 82.
water proof, composition of the liquor for, 80
Clouet's researches on enamel, 389, 401.
Colours, painters', to levigate, 456
Committee of public safety, instructions by, for purifying saltpetre, 209
Cook, on the construction of theatres, 379.
Copper, to give it the grain and hardness of steel, 415
Coxe's observations on the uses of the sunflower, 22.
description of a revolving telegraph, 99.
improvement in bedsteads, 283.
Crater of Vesuvius, account of a descent into the, 12.
Cumberland, on perspective, 255.
's files made of stone ware, 387.
Cummings' composition for making German asses skin, 75.
Cuthbertson, on increasing the charging capacity of electrical jars, 193

D.

Davis' security for doors and windows, 185.
Dodun, on a factitious puzzolana, 241.
Dossie, on the edulcoration of fish oil, 333.
Drawings from nature, instrument to make correct, 265.
Dutch method of curing herrings, 40.

E.

Engravings, engraved title page.
Argand's valve siphon, 20.
machine to raise water, 26.
Moult's filtering apparatus, 32.
Smith's mode of relieving a fallen horse, 34.
Taylor's machine for raising water, 38.
head of Dr. Rittenhouse, 80.
Coxe's revolving telegraph, 99.
Brodie's method of coating iron bars, 110.

Engravings, Massey's sea log and sounding machine, 111.
driving copper bolts into ships, 180.
Description of a water wheel, 183
securing doors, &c. from housebreakers, 185.
Ramsden's optigraph improved, 198.
perspective and elliptic instrument, 201.
Cumberland, on perspective, 255.
Edgeworth's perspective instrument, 258.
Mortlock's surveying, 263.
perspective instrument, 265.
Wollaston's camera lucida, 267.
Coxe's improved bedstead, 283.
Cayley's plan for an improved theatre, 350.
Malton's port-folios, 362.
Plowman's improved sheepfold, 365.
Le Caan's improved tramplate, 368.
Bowler's screw press, 373.
securing beams of ships without wooden knees, 376.
Varty's linch pins for carriages, 378.
Ward's machine for workers in white lead, 453.
Rawlinson's mill for levigating colours; with an improved mill for indigo and dry colours, 456.
Saddler, on refining lead, 463.
Atkins's universal hydrometer, 469.
Waistell's improved field gate, 475.
Edgeworth's description of an instrument for drawing in perspective, 258.
Edgeworth, on the construction of theatres, 353.
Electrical jars, to increase their charging capacity, 193.
Enamel, researches on its composition, 389, 401.

F.

Falconer's remarks on soap suds as a manure, 289.
Feathers, process to clean them from their animal oil, 233.
Piles, made of stone ware, 387.
Filtering stone, new mode of use for purifying water, 32.
Flax of New Zealand, compared with other substances, 444.

G.

Gate, an improved one for fields, 475.
Georgi, on Swedish stone paper, or artificial slate, 133.
Germon, memoir of, on the vineyards and wines of Champagne in France, 1, 81, 166.
Goods, of cotton, silk, or woollen, to clean, 236.
Grafting, walnut, mulberry, and chesnut trees, observations on, 295.
Grand's method of preparing painters' pannels, 272.

H.

Herrings, British, cured as Dutch, 40.
Hydraulic ram, 80.
Hydrometer, Atkins' universal, 469.

I. J.

Indigo mill, an improved one, 462.
Ink, writing, report on its composition, 43.
Lewis' receipt for, 48.
Ribancourt's receipt for, *ibid.*
Intelligence, &c. 80, 240.
Irwin's experiments on soap suds as a manure, 289.
Jones' description of the optigraph, 198.

K.

Knight, on grafting walnut, mulberry, and chesnut trees, 295.
Klaproth, on employing platina in porcelain painting, 439.

L.

Labillardiere, on the comparative strength of New Zealand flax, 444.
Lead, white, to prevent injury to workmen in preparing, 453.
on refining it, 463.
Le Caan's improved tram plates, 368.
Lenormand, on the art of moulding in wood, 417.
Lewis' receipt for writing ink, 48.
Linchpins of carriages, to secure, 378.
Lussac and Thenard's memoir on vegetable and animal analysis, 49.

M.

Machine to raise water to any height, 26.
Malton, on making large portfolios, 362.
Mammoth, Adams' account of a journey to obtain, 219.
Massey's description of a sea log and sounding machine, 111.
Method of relieving horses fallen in loaded carts, 34.

Mill for grinding dry colours, 452.
Morris, on cleaning silk, woollen, and cotton goods, 236.
Mortlock's easy method of surveying, 263.
Moult's apparatus for filtering water, 32.
Mule, foal produced from, by intercourse with a stallion, 240.

N.

Nankeen colour, on the process for dyeing, 435.
Nature, instrument for making correct drawings from, 265.
Nystrom, on preparing and applying amber varnish, 406.

O.

Oak bark, substitutes for, in tanning, 423.
Oil, to purify, for chronometers, 187.
on the edulcoration of fish, 333.
rapeseed, to purify, 348.
Optigraph, description of, 198.
Ovals, an instrument for delineating, 201.

P.

Painters' pannels, method of preparing, 272.
Patents, list of American, 154, 237, 318.
English, 77.
account of the method of obtaining, 274.
Patent bedstead, description of one, 283.
Pallas, on making grained parchment, or shagreen, 309.
Parry, on the decay of wood, and its prevention, 298, 321.
Patterson's composition for weather boarding, 208.
Perspective instrument, for drawing from nature, 201
an useful scale for dividing the vanishing lines of, 255.
description of an instrument for drawing in, 258.
Phillips' method of driving bolts into ships, 180.
Plowman, on an improved sheepfold, 365.
Porcelain painting, on the use of platina in, 439.
Portfolios, on making large ones, 362.
Puzzolana, discovery of a factitious, 241.
on natural and artificial, 250.

R.

Rail-ways, some account of, 28.
Rawlinson's mill for levigating painters' colours, 456.
Ribancourt's receipt for writing ink, 48.
Richardson's process for cleaning feathers, 233.

S.

Saddler, on refining lead, 463.
Sage, on giving to copper the grain and hardness of steel, 415.
Saltpetre, French method of purifying, 209.
Saponaceous liquor, for domestic use, 66.—Note.
Sarjeant's cheap engine for raising water, 38.
Screwpress, with an expanding power, 373.
Sea log and sounding machine, description of, 111.
Serres, on chemical printing, 203.
Shagreen, on the mode of making at Astracan, 309.
Sheepfold, an improved one, 365.
Ships, mode of driving copper bolts into, 180.
Siphon, description of Argand's valve, 20.
Smith's mode of raising a loaded cart when the shaft horse has fallen, 34.
Sneyd, on preserving seeds in a state fit for vegetation, 124.
Soap of wool, method of making, and its use, 66.
suds, used as a manure, 289.
Stilton cheese, method of making, 152.
Straw, on its use in strawberry beds, 292
Sunflower, account of its uses, 22.
Surveying, easy method of, 263.
Swedish stone paper, or artificial slate, experiments on, 133.

T.

Tanning, substitutes for oak bark in, 423.
Tarry's memoir on writing ink, report on, 43.
Telegraph, Coxe's description of a revolving, 99.
Theatres, plan for an improved, 350.
on the construction of, 353, 379.
Thenard, on the purification of rapeseed oil, 348.
and Lussac's memoir on vegetable and animal analysis, 49.

Thornton's, Dr. account of the method of obtaining patents, 274.
Tram plates, for rail roads, improved, 368.

V.

Varnish, a permanent and elastic, for hats, gaiters, &c 62.
Varty's mode of securing carriage wheels, 378.
Vegetation, to preserve seeds in a fit state for, 124.
Vegetables, easy mode of converting into manure, 126.
Verdigrise, verdet, &c. observations on making, 141.
Vesuvius, account of a descent into its crater, 12.
Vineyards and wines of Champagne, memoir on the, 1, 81, 161.

W.

Waistell's improved field gate, 475.
Walker, on purifying oil for chronometers, 187.
Ward's method of preventing injury in preparing white lead, 453.
Water, machine for raising it to any height, 26.
a cheap machine to raise it, 38.
to preserve sweet, in long voyages, 59.
wheel, description of Mr. Besant's, 183.
Weather boarding, composition for, 208.
Williams' mode of securing the beams of ships without knees, &c. 376.
Wines of Champagne, memoir on, 1, 81, 161.
Window shutters and door pannels, to secure, 185.
Wingfield, on increasing the charging capacity of electrical jars, 193.
Wollaston's description of the camera lucida, 267.
Wood, on its decay, and the prevention of, 298, 321.
Beckmann's observations and experiments on staining, 127.
